DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claim 6, 18, and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Potsch et al. (3,788,180) in view of Wingen (4,275,631). See Appendix A for examiner added reference numerals. Potsch et al. discloses the invention including a drum-shaped rotary blade (53), a disk shaped rotary blade (68), that the rotary blade has a cutting edge (Fig. 9), a first beveled surface facing the drumshaped rotary blade and progressively spaced from the drum-shaped rotary blade toward the cutting edge (68'), a second beveled surface facing the work piece and progressively spaced from the cutting edge away from the work piece (200), a plurality of disk-shaped rotary blades (68), and wherein the disk-shaped rotary blade is one of a plurality of a disk-shaped rotary blades (Fig. 2).

However, Potsch et al. fail to disclose that the disk-shaped rotary blade has irregularities along a circumference of the blade, the irregularities have an irregularity quantity set to a value which ranges from 0.5µm to 5µm, the irregularities have one of saw-tooth shaped and undulating shape, the irregularity quantity is substantially along a radial direction of the disk-shaped rotary blade perpendicular to the rotational axis, the irregularity quantity being a distance from a bottom to a top of one of the irregularities,

Art Unit: 3724

the drum-shaped rotary blade comprises a plurality of grooves, each of the plurality of disk-shaped rotary blades corresponding to one of the plurality of grooves, and wherein the plurality of grooves are disposed on a surface of the drum-shaped rotary blade.

Wingen teaches that it is old and well known in the art of slitter blades that these blades have irregularities in an undulating shape (Column 4, lines 6-10). It is old and well known that irregularities come in extremely small sizes. Its old and well known to have the surface as smooth as possible making the irregularities as small as possible therefore it would have been obvious to one skilled in the art to have made the irregularities within the claimed range. Wingen also teaches the irregularity quantity is substantially along a radial direction of the disk-shaped rotary blade perpendicular to the rotational axis (Column 4, lines 6-10). It is old and well known that irregularities occur on any surface in manufacturing of disk-shaped materials or any other materials. Wingen teaches that it is old and well known in the art of slitter blades the drum-shaped rotary blade comprises a plurality of grooves (14), each of the plurality of disk-shaped rotary blades corresponding to one of the plurality of grooves (Fig. 3), and wherein the plurality of grooves are disposed on a surface of the drum-shaped rotary blade (Fig. 3). Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to have provided Potsch et al. with irregularities, as taught by Wingen, to provide the desired smoothness of the cutting apparatus.

Response to Arguments

Applicant's arguments with respect to Applicant's arguments filed 09 February
 have been fully considered but they are not persuasive. It is old and well known

Art Unit: 3724

that anything manufactured has some sort of irregularities associated with the apparatus. It is old and well known in the art of manufacturing that irregularities occur on every surface and occur at every size. Wingen teaches the existence of irregularities, however as previously stated, irregularities and their locations are old and well known.

Allowable Subject Matter

4. Claims 1-5, 7, 15-17, 19, 20, and 24-26 are allowed.

Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Prone whose telephone number is (571) 272-4513. The examiner can normally be reached on 7:00-4:30, Mon - (every other) Fri.

Art Unit: 3724

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer D. Ashley can be reached on (571) 272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
